Music Player   2015 - 2015

Android Project

It is a simple but friendly music player, which most logic code write on service since it can run background. And many interesting features like gesture control are added.

Education

Software architecture and System integration, M.E   2016 - Present

Conservatoire National des Arts et Métiers

- Java Software Architectures
- System Architecture
- Project Engineering
- Android & Java card

Computer Technology, M.E   2015 - 2018

Beijing University of Technology

- Object - oriented design
- Software engineering
- Software architecture
- Artificial intelligence

Computer Science, B.S   2011 - 2015

Shanxi Agricultural University

Job Type

Type   : Internship
Duration : 5 - 6 month
Start Time : Now

Skills

Techniques

EJB, Spring MVC, Spring, MyBatis, Android development, Hadoop, MySQL

Languages

Java(main), C++, Python, HTML

Support

Maven, Ant, Git, Junit, UML

BaseTec

Software Engineering, Design Pattern, Object-oriented design

Theory

Computer Science Theory, Algorithms, Data Structure

Environment

Linux/Windows, Eclipse/Intellij, Office

Language

Chinese: Native

English : Fluent
